Scholarships provided by the **Ernest Solvay Foundation** as part of the Association for the Promotion of Sciences and Humanities in Germany

The scholarships support those studying the subjects of Chemical Engineering, Process Engineering, or Technical Chemistry at German universities (where German is the primary language used for teaching) to spend some time studying abroad. It also enables students from Eastern and Central European countries to spend a research semester at a university in Germany.

Support is available to students approaching the end of their Diploma, Master or Bachelor studies; preferably those who carry out a course work project at a foreign university. Excellent results during the courses so far and good foreign language skills are essential.

From 2007, support will also be offered to students from Eastern and Central European countries, who would like to spend a research semester at a university in Germany as part of their Diploma or Master studies.

We want to point out an actual supplement concerning the scholarships of the foundation: in compliance with the existing terms of granting scholarships, projects which focus on Energy Storage, Renewable Energy and Materials for Electronics (Printed Electronics) would be appreciated.

The scholarship consists of a contribution to travelling expenses and an appropriate grant to cover living costs for up to six months. The stay at the university abroad can begin at the earliest 2 months after the mentioned deadlines.

Application forms and further information is available from the Association for the Promotion of Sciences and Humanities in Germany: www.solvay-stiftung.de

Applications can be submitted until May 31 or December 31 of any year to:
Stifterverband für die Deutsche Wissenschaft e.V., Ms Renate Zindler, Postfach 16 44 60, 45224 Essen, Germany.

The applications are to be submitted in duplicate. One application postal to the above mentioned address, the second application as pdf-file either on a data medium or to the email address: renate.zindler@stifterverband.de.

We ask for understanding that applications can be only accepted, if they are submitted as written paper and as pdf-file.
Please enclose your CV, a photograph, proof of university entry qualifications, intermediate examination certificate, any results of final degree exams already taken, references from two university lecturers, as well as proof and description of a research project at a reputable university abroad.

Applications from foreign students should be submitted via the lecturer in Germany supervising the work.

Board of trustees
Dr.rer.nat. Andreas H. Meier, Chairman of the Management Board of SOLVAY GmbH, Hannover (Chairman)
Professor Dr.-Ing. Andreas Seidel-Morgenstern, Chemical Process Engineering,
Otto-von-Guericke-University Magdeburg (Deputy Chairman)
Professor Dr.-Ing. Matthias Kind, Thermal Process Engineering, Karlsruhe Institute of Technology
Professor Dr.rer.nat. Gabriele Sadowski, Thermodynamics, Technical University, Dortmund
Renate Zindler, Association for the Promotion of Sciences and Humanities in Germany, Essen
